1. User Management Flow

Creating New Users (Super Admin/Admin only)

START: Admin/Super Admin logged in (/borrowing-countries/dashboard)

↓

Navigate to "User Management" (/borrowing-countries/user-management)

↓

Enter user email address

↓

Select role from dropdown:

- Admin

- Operator
↓
Click "Send Invites" button
↓
System sends email invitation
↓
[USER RECEIVES EMAIL – (e.g. /borrowing-countries/user-management/verification)]
↓
User clicks "Verify Email" in email
↓
User redirected to verification code page (/borrowing-countries/user-management/enter-code)
↓
User enters verification code
↓
User redirected to login page (/login)
↓
User can now log in with role-based access
↓
END: New user active in system

Editing Existing Users

START: Admin/Super Admin in User Management (/borrowing-countries/user-management)
↓
View list of existing users
↓
Click on "View Details" to edit
↓
Available actions:

- Change Name
- Change Status (Active ↔ Deactivated)
- Change/Reset password
- Change photo
- Change role (Admin ↔ Operator)
- Delete user (except Super Admin)

↓

Save changes

↓

END: User updated

N.b. UNAVAILABLE ACTION: change email.

2. Knowledge Base Management Flow

Creating Knowledge Bases (Admin/Super Admin only)

START: Admin logged in

↓

Navigate to "Knowledge Bases" (land on /borrowing-countries/bases/global)

↓

Select knowledge base type:

- Global /borrowing-countries/bases/global
- Project /borrowing-countries/bases/project
- Procurement Activity /borrowing-countries/bases/procurement-activity

↓

Click "Create New Knowledge Base"

↓

// For Global (2 steps)

STEP 1: Basic Information & Knowledge Base Documents

- Start by naming your knowledge base (Free text)
- State knowledge base type (Dropdown)
- State procurement category (Free text)
- Add brief description of this knowledge base (Free text)
- Upload documents (file uploader)

↓

STEP 2: Output Templates

- Upload output template (file uploader)

↓

// For Project (1 step)

STEP 1: Basic Information & Knowledge Base Documents

- Start by naming your project (Free text)
- Implementing Agency (Free text)
- Add brief description of this knowledge base (Free text)
- Upload documents (file uploader)

↓

// For Procurement Activity (3 steps)

STEP 1: Basic Information & Knowledge Base Documents (pre-docs)

- Start by naming your procurement activity (Free text)
- Enter your procurement activity ID (Free text)
- Select procurement activity method (Drop down)
- Add brief description of this knowledge base (Free text)
- Upload documents (file uploader)

↓

STEP 2: Document Upload (RFx docs specifically)

- Upload documents (file uploader)

↓
STEP 3: Document Upload (supporting docs specifically)
– Upload documents (file uploader)
↓
Create/Save knowledge base
↓
END: Knowledge base available for use (once processed)
N.b... says Processing until Complete. Auto sets to Active once complete (but can't be Active until Complete)

Managing Existing Knowledge Bases

START: Admin in Knowledge Bases section

↓
View knowledge bases by type:
– Global tab – /borrowing-countries/bases/global
– Project tab – /borrowing-countries/bases/project
– Procurement Activity tab – /borrowing-countries/bases/procurement-activity

↓
For each knowledge base, can:
– View details (e.g. /borrowing-countries/bases/procurement-activity/knowledge-base?projectId=8641b9a0-1ff1-4ebc-90ba-7d9d4e663185)
– Edit content (e.g. remove / add new docs)
– Toggle Active/Inactive status
– Delete knowledge base

↓
Changes affect availability in other parts of system:
– Inactive bases don't appear in drop downs or as cards on pages outside of knowledge base section

- Active bases appear in document validation and on cards outside of knowledge base section

↓

END: Knowledge base updated

3. Document Validation Flow

Document Upload and Assessment (Admin/Operator)

START: User logged in

↓

Navigate to "Validate Documents" – /borrowing-countries/verify-documents

↓

View previously assessed documents – e.g. only /borrowing-countries/verify-documents/
b8e4d0c3-5f72-4e90-0d4g-3f9b7e2c6g58

OR

Click "Upload Document"

↓

STEP 1: Select Global Knowledge Base

- Dropdown shows active Global knowledge bases
- Options: "Evaluation Report TER" or "Evaluation Report CER"

↓

STEP 2: Select Procurement Activity

- Dropdown shows active Procurement Activity knowledge bases
- Selection depends on specific project/activity

↓

STEP 3: Select Output Language

- English

- Bahasa Indonesia

↓

STEP 4: Upload Document

- Select files (PDF/Word/Excel)
- Click upload

↓

PROCESSING (30 minutes average):

- Spinning wheel with progress indicators
- Show current processing step:
 - * Document analysis
 - * Knowledge base comparison
 - * Compliance checking
 - * Report generation
 - * Language translation (if Bahasa selected)

↓

User can:

- Close window and return later
- Stay on page and wait

↓

COMPLETION:

- Assessment complete notification
- Results page with compliance report
- Download PDF option

↓

END: Document assessed and stored

Viewing Previous Assessments

START: User in Validate Documents – /borrowing-countries/verify-documents

↓

View list of previous assessments:

- Document name
- Document type (TER or CER)
- Date assessed
- Language
- Status (Complete/Processing/Failed)
- Action buttons (view / delete)

↓

Click "View" icon on assessment

↓

Assessment results page shows all information as per output template:

↓

Options:

- Download PDF report

↓

END: Results viewed

4. Profile Management Flow

Viewing Own Profile (All users)

START: Any user logged in and on Dashboard – /borrowing-countries/dashboard

↓

Click on profile icon/name, select "View profile"

↓

View profile – e.g. /borrowing-countries/user-management/olivia%40example.com – page showing:

- Name (editable)

- Email (non-editable)
 - Password (editable / reset)
 - Photo (editable)
 - Role (non-editable)
 - Category (when we get around to determining what this is)
- ↓

END: Profile information displayed

5. User Documentation Access Flow

Accessing Documentation (All users)

START: User logged in

↓

Navigate to "User Documentation"

↓

User uses natural language chat interface to ask questions about how to use certain aspects of the site.

6. Assess and Compare Responses Flow (Phase 2)

Uploading Response for Assessment

START: User logged in

↓

Navigate to "Procure" section – /borrowing-countries/procure

↓

Select Procurement Activity from list – e.g. /borrowing-countries/procure/procurement-activity?activityId=8641b9a0-1ff1-4ebc-90ba-7d9d4e663185

(shows active Procurement Activities only)

↓

Choose assessment phase:

- Technical (no financial info)
- Combined (includes financial info)

↓

Click "Upload Response" – e.g. /borrowing-countries/procure/upload-response?activityId=8641b9a0-1ff1-4ebc-90ba-7d9d4e663185

↓

Form auto-populates based on selection (and what the system knows about that procurement activity):

- Selected procurement activity
- Selected phase (Technical/Combined)

↓

Upload vendor response document

↓

PROCESSING (similar to document validation):

- Document analysis
- Criteria matching
- Scoring against requirements

↓

Response assessment complete:

- Shows on procurement activity page

↓

END: Response assessed and stored

Viewing (Previous) Assessment

START: User in specific Procurement Activity area – e.g. /borrowing-countries/procure/procurement-activity?activityId=8641b9a0-1ff1-4ebc-90ba-7d9d4e663185

↓

View list of previous assessments:

- Response from
- Submitted
- Status
- Score (progress bar and score %)
- Action buttons (view / delete)

↓

Click "View" icon on assessment

↓

Assessment results page shows all information as per output template – e.g. /borrowing-countries/procure/evaluation?evaluationId=b8c3d5e2-9f4a-5b72-c6d3-0e7f9a2c4b58

↓

Options:

- Download PDF report

↓

END: Results viewed

Comparing Multiple Responses

START: User on Procurement Activity page – e.g. /borrowing-countries/procure/procurement-activity?activityId=8641b9a0-1ff1-4ebc-90ba-7d9d4e663185

↓

View list of assessed responses (under Technical OR Combined):

- Response from
- Submitted

- Status
- Score (progress bar and score %)
- Action buttons (view / delete)

↓

Select responses to compare (using checkboxes):

- Check boxes next to responses (max 3)

OR

- If none selected, system uses top 3 by score%

↓

Click "Actions" → "Compare Responses"

↓

PROCESSING:

- Analyze selected responses
- Generate comparison report

↓

Comparison results page shows:

- Side-by-side analysis
- Pros and cons for each vendor
- Criteria-based comparison
- Key differentiators

↓

Options:

- Download comparison report
- Export to PDF

↓

END: Responses compared

Knowledge Base Pairing Logic

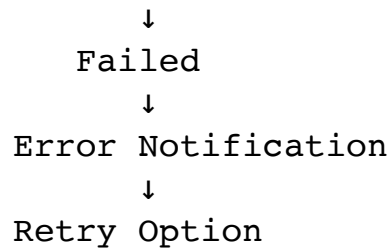

Document Type	Required Knowledge Bases
-----	-----
TER/CER Validation	Global + Procurement Activity
RFP Response Assessment	Global + Procurement Activity
TER/CER Creation	Global + Procurement Activity
ToR Creation	Global + Project
RFP/Bid Creation	Global + Project

Priority Rule: Procurement Activity > Global (for conflicts)

System States and Error Handling

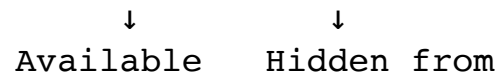

Document Processing States

Upload → Queued → Processing → Complete

Knowledge Base States

Draft → Active → Inactive (deactivated)

in system dropdowns

User Account States

Invited → Verified → Active → Inactive

Deactivated

(Can be reactivated)
